

Penetration Testing

Find weaknesses before attackers do

We test your systems through the eyes of an attacker, so you understand your risks, know what to fix, and give your customers real assurance.

What you receive

Easy to understand report scoped to your business needs that sets out what we tested, what we found, and what to fix first, plus a walkthrough with the experts.

Why Vorboss?

- ✓ OSCP-accredited testers
- ✓ Easy to understand reports for all audiences
- ✓ No outsourcing – everything done in-house
- ✓ Scoped by experts

How we support you

Build trust

Show clients, partners, and insurers your defences are solid.

Specialist testing

Ethical hackers test your systems in the same way an attacker would.

Attack surface review

Apps, cloud, identity, and systems reviewed.

Gain assurance

Unbiased third-party testing.
